# 271	Name: <b>Hastings</b>		Cause: Unknown	Admin: <b>L&amp;W</b>

Narrative: Minimal movement or spread is expected in the direction of Washington Creek at this stage of the fire. Fire activity observed was actively backing organized surface fire with torching on 25% slope with North aspect in black spruce.

The weather is on a warming trend which potentially will increase fire activity where heat sources exist. Crews have tied the handline on the Western flank in from H-20 down to Washington Creek. A new division (D) was established along Washington creek for the purpose of dealing with fire encroachment on the creek. A burnout commenced in Div. R in a large unburned island. Fire suppression repair work is beginning to take place on the East flank dozer line down to Washington Creek.

Crews on the west flank will begin mopping-up 200-300` in, down to Washington Creek. Mop-up will continue on the East flank. Crews and equipment will continue rehab on the cat line down to Washington Creek. The burnout operation will be continued in Div. R if objectives haven't been met today.

Narrative: No change in cost to reflect ongoing estimates. The Delta crew worked on divisions A/B to rehab around a cabin, grid the H-5 camps for garbage, and prepare sling loads to demob items off the line. In division G/P helicopter crew members worked to clean up helispots and prepare backhaul. Crews continued complete mop-up and gridding along the line and between helispots on division Z. The uncontained eastern edge was mapped and scanned for heat. Demob was ongoing for ODF team members. The Chevak #2 crew also demobed. Warmer temperatures and lower relative humidity allowed one small hotspot 200' inside the perimeter on the west flank to become exposed. Ground forces aided by helicopter bucket work cooled it down. Two additional crews will demob during the next operational period while other ground forces continue to grid, mop-up, retrieve equipment and clean camp areas. The suppression objectives have been achieved on the west flank. The remainder of the fire is uncontained.
